ALLOWANCE

Drawings

1. Currently, the drawings in the application filed on September 29, 2000 are informal (i.e., hand-drawn). Please submit formal drawings as required in an Office Action September 2, 2003.

Response to Arguments

2. Applicant's arguments, see Remarks (pages 10-13), filed on March 3, 2005, with respect to claims 1-31 have been fully considered and are persuasive. The rejections of claims 1-31 under 35 U.S.C. 103(a) have been withdrawn.

Allowable Subject Matter

3. Claims 1-31 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method, device and a camera for steganographically combining data as disclosed in independent claims 1, 15 and 24. The claimed invention distinguishes over the prior art by the manner in which the plurality of steganographic data combinations are created by combining first data and meta-data and having figure-of-merit algorithm for determining an appropriate region of the first data to embed the meta-data for each steganographic technique. The claimed combination allows for improving a method for combining the data, steganographically. Steganographically combining the data is conventional in the prior art. However, the prior art of record fails to teach having a figure-of-merit algorithm comparing the steganographic data combinations and the first data to select a steganographic data combination from the plurality of steganographic data combinations with the least discernible changes from the first data. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 2-14, 16-23, and 25-31 are allowed for the same reasons.
